DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-79, drawn to nucleic acids, plant cells, plants and methods thereby drawn to inhibition of accumulation of at least one benzyloquinoline alkaloid above normal levels.

Group II, claim(s) 80-96, drawn to straw extract, opium or latex extract, alkaloid extract and methods of extracting thereof.

Group III, claim(s) 97, drawn to a deposited microorganism.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: there is no special technical feature because a cytochrome P450 encoding sequence from poppy involved in a step of the alkaloid biosynthetic pathway was known in the art. Rosco *et al* (Arch. Biochem. Biophys. 1997 Dec 15; 348(2): pp. 369-377) teach cloning and heterologous expression of NADPH-cytochrome P450 reductases from Papaveraceae (see abstract and entire article).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
